BUILDING: The Old Printing House building is one of the restored buildings part of the Fuzja project. This modern building with a historic facade has all the amenities of new construction – modern staircases, elegant common areas, and elevators. The original walls of the historic buildings have been restored, including the authentic Łódź brick that distinguishes the factory buildings. The cast iron pillars, staircase elements, and window glazing bars have also been restored. The common spaces surrounding the lofts and loft apartments are finished in a minimalist style using concrete, tempered steel, and glass. One interesting feature is the adaptation of cast iron columns that once supported the ceilings, now welcoming residents and guests with an original colonnade. ABOUT FUZJA: A unique project consisting of 20 buildings for various purposes, 14 of which are adapted historical buildings. Its heart is the historic Art Nouveau CHP plant and the surrounding square, built on the site of the former Karol Scheibler factory. Modern residential buildings and office buildings have already been completed, including the Łódź offices of Fujitsu Poland Global Delivery Centre. FOR RESIDENTS: Residents' Club, a creative playground for children, Anna's Gardens – a leafy square, and historical details – staircases with original artifacts referencing the industrial past. Archicom Smart eco-friendly solutions – smart home solutions, a wireless smart home management system. Archicom Life Services – access to common areas via a smartphone app, a parcel pickup point, an electric vehicle charging station, recreational areas, and bicycle storage.
